To the Students of the Northern Alberta Institute of Technology:

Governor-General Michner, on the occasion of his visit to the Institute, referred to the accelerating impact of technological change upon our society. There are some positive and beneficial effects such as: the improving of working conditions, the increasing of productivity, and the raising of our standard of living, which can result in a richer, more fruitful and satisfying life for all. Unfortunately, however, it has also been proven that there can be undesirable results which are related to such effects as the displacement of labour, the obsolescence of skills and equipment, undue profiteering and unemployment. These negative effects are matters of immediate concern for unprepared or disadvantaged persons, and, on the global scene, for major portions of the populations of under-developed countries. Certainly, the impact of technological change upon our way of life is a matter of grave concern for all.

The Northern Alberta Institute of Technology has a major role to fill in meeting the challenges presented to us by technological change. When changes of a technical nature are understood and adequate plans are made in advance for their implementation, the less desirable effects can be minimized. You are being provided with the opportunity to understand and appreciate the applications of theory as it is applied in modern industry and business and, as a consequence, upon graduation will be in the happy position of readily finding successful and useful employment. Moreover, you will find adjustment to continuing change reasonably possible during your career.

It is our hope and expectation that you are making the most of the excellent opportunities being provided, and our wish that you have every success in your future career.

# Centennial Plus One

I think it is most appropriate that this year's issue of the Northern Torch has the theme Centennial Plus One. This indicates that we are not letting down after our Centennial Year, but going on. We are still trying to assess the full impact of our Centennial Year, perhaps it will be years before the full story is known; perhaps for the first time something that we all became involved in as Canadians promoting Canada, gained world wide prominence; perhaps for the first time in world opinion Canada became the center of attraction on the world stage; perhaps for the first time Canada, "the bit player" became Canada, "the star"; perhaps it took the glamour, the glitter and the magnitude of Expo to make the world realize that Canada also has the ability to perform the role of "the star" and perhaps the time has now arrived when Canada should give notice to the world that henceforth she will not be content to be known as the easy going, reliable "bit player", playing the supporting role and basking in the reflective glory of some other star.

How do we uphold and maintain our newly gained image? We can't have an Expo every year; this would not be practical. As a matter of fact, it might not be right to stage any other type of extravaganza to attract attention to ourselves. This might even hurt our image if repeated too soon.

During Centennial Plus One, let us prove our point and maintain our status by acting as a mature nation. This means greater self-reliance, greater belief in our own ability to solve our own problems, greater national responsibility and greater assertion individually and collectively to increase national productivity. To start Centennial Plus One let us undertake something that each individual considers to be his or her personal responsibility and let it be something that contributes to our nation as a whole.

The simple act of doing your very best in your chosen field as a Technician may be your contribution to Centennial Plus One. I wonder if you realize that you represent the vital link between design ideas and goods produced. As a matter of fact, you may be the production control. Don't let your control become the production bottleneck. Don't let anyone do a better job than you are capable of doing in Centennial Plus One.

*The Nugget*

I consider it an honour to be able to add my message to this 1968 edition of the Northern Torch.

It is with a great deal of enthusiasm that I speak about N.A.I.T. and the many opportunities it provides us during our stay. We are all here to complete a course of studies which will enable us to take a more secure position in today's everchanging world, and it is interesting to see the many changes that N.A.I.T. is rapidly moving through. Each year there is an addition of more courses and more people in the hallways. The people at N.A.I.T. make our two or three year stay a memorable and beneficial experience.

Many of us meet friends that we will know for a good part of our lives, and some meet their future wives or husbands. There are others that we will remember only occasionally because of something we have learned from his or her personality.

We learn from the academically proficient the advantages of gaining knowledge, from the adventurous who will leave on CUSO trips the benefits of non-conforming and taking a challenging experience.

The many ambitious people show us that high grades are not the only path to success but that new ideas, determination and speculating into tomorrow provide another ladder to the top. Every possible personal characteristic is present in the students of N.A.I.T. and we can see that integrity, understanding, attitudes towards other people, and a person's general moral standards are factors in his success as a person. By looking at others we can evaluate ourselves and hopefully learn from their bad or good examples.

Experiences are to be shared with others and N.A.I.T. students

share many. It may be the usual Friday gathering of friends at the bar, a Challenge-Cup event, a N.A.I.T. athletic team, a team comprising the N.A.I.T.S.A. executive, or a paper staff.

We have always found people working, playing, and in some cases fighting together. When we think about our accomplishments at N.A.I.T. in later years we will always relate them to people who helped and encouraged us.

There is a second dimension to our education at N.A.I.T. and although it is not academic it is just as important.

The many people we associate with give us a chance to develop socially and give us an opportunity to let our personalities and characteristics reflect.

N.A.I.T. as a building, the administration, and the instructors are an important part of our education, but they are only a tool. Our total education depends upon ourselves and the many other students we have grown to know, worked with, and learned much from.

I would like to take this opportunity to thank all the many people, especially my staff who have helped me by giving much of their time, ideas, and efforts with this year's editions of the Nugget. This experience has been a learning process to most of us, one that we will benefit from and one that we are extremely thankful for.

During this, my final year at the Institute I have had the pleasure of working with a great number of sincere hard-working people and as the old saying goes there are just too many to mention them here but the people involved will know who I mean when I say thank you for a job very well done.

There are many ups and downs involved in putting together a yearbook and I think that this staff has been through all of them during this year. I feel that all of this staff should be able to look back on this book in a few years and feel particularly proud for the contribution that they have made to it.

This year has seen the incorporation of several new technologies that by their very successful existence show that they are absolutely essential in this ever-expanding world of technology.

We are now in the midst of forming a good strong reputation in the business world and to all of the graduates of today and tomorrow . . . always give your best because the end is not in sight.

For myself N.A.I.T. has been one of many beginnings in the education process. From primary to secondary schools there were many beginnings and endings. We all began N.A.I.T. with high hopes for what "NAIT's" ending could offer us in the future.

N.A.I.T. had much to offer, but one comes to realize that the more formal education a person receives, the less you actually know. It is this searching for more thorough and complete knowledge that I believe typifies the N.A.I.T. student.

We have come to a point in our lives where what we decide now will have a direct bearing, on not only our lives, but the lives of our fellows. It is with a new and generating type of confidence that a N.A.I.T. graduate steps forth into the world of tomorrow to meet this challenge.

When all the assignments are handed in for the last time, and final exams written and passed, and the day comes when you finally receive that diploma, it means the end of one stage of a great deal of hard work, but when you look back upon your days at N.A.I.T. there will be many enjoyable occasions to remember. For myself the good occasions far outnumber the less pleasant ones,

and I would like to thank all the students and staff who have made my stay at N.A.I.T. as good as it has been, for it is these people who have helped others over their difficult times and it is to these people who a great deal of credit must go.

To those of you who still have one or two years before graduation, I say make the most of your remaining years. A good student is one who not only receives high marks, but one who knows what it means to PARTICIPATE.

Once again to those who will remain GOODBYE and GOOD LUCK. To those who are graduating, all the best for a successful and rewarding future.

In my official capacity at the Institute I have been closely allied with the Student Association since its inception in 1963. Over this period of time the Association has had its sparkling successes and its resounding failures but generally the quality and quantity of the programs has steadily risen. This steady improvement can only be attributed to the hard work of those among the student body who cared and were concerned enough to do something. Therefore, in the space allotted to me I wish to pay tribute to those concerned students and express a wish that this attitude become infectious and spread throughout the total student body. Therein lies the hope and success of the Student Association and therein also lies the hope and success of our great nation of Canada.

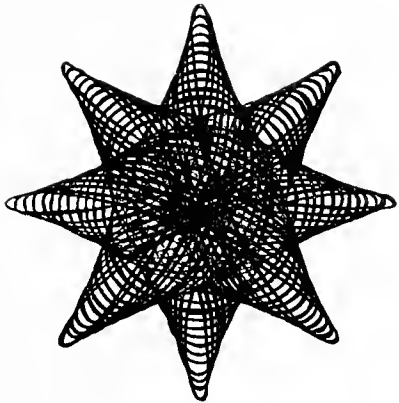

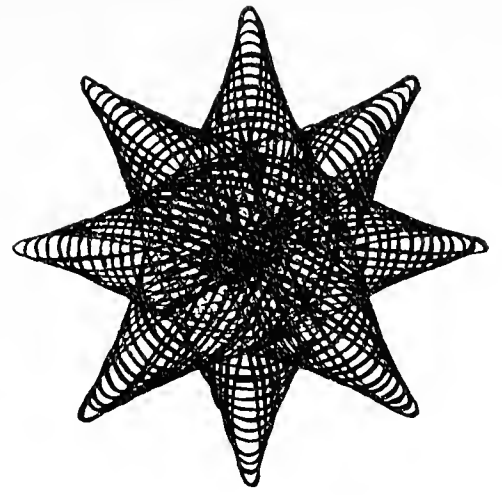

In conclusion I would like to thank the Northern Torch for this opportunity to express myself and to become a more integral part of one of our finest achievements, an achievement that you as well as I can be justly proud of.

"THE SIX MUSKETEERS AND ONE MUSKETEERESS"

OH! OH! I TINK I MADE A MISHTAKE!

YOU BETTER BELIEVE HE MADE A MISTAKE!

THROUGHOUT THE YEAR N.A.I.T. HAS BEEN ENTERTAINED BY THE SOUNDS OF THEIR RADIO STATION. N.A.I.T. RADIO SERVED THE SCHOOL IN MANY WAYS THIS YEAR. FROM THEIR ENTERTAINING MUSIC AND VARIOUS ANNOUNCEMENTS N.A.I.T. STUDENTS WERE ALWAYS ON TOP OF THE SCENE. AS ALWAYS THE REACTION TO THE STATION'S PROGRAMS WAS VERY INTERESTING. DUE TO THE MANY PEOPLE INVOLVED IN N.A.I.T. RADIO IT WAS SHOWN ONCE AND FOR ALL THAT A SERVICE OF THIS TYPE CAN PROVE TO BE INVALUABLE TO THE INSTITUTE. IN ADDITION TO THE REGULAR BROADCASTS A NEW FEATURE WAS ADDED "THE MINITORIAL". THIS PROVED TO BE VERY INTERESTING AND BROUGHT OUT MANY THOUGHT-PROVOKING IDEAS.

MANY THANKS TO PHIL, SAUL AND THE CAST OF MILLIONS FOR A FINE YEAR OF BROADCASTING.

This year's N.A.I.T. Television Club served the Institute in a great variety of ways. The club televised all news from the different technologies and played an important role in keeping N.A.I.T. students informed of the activities being held within the Institute.

Their cameras were ever present at all activities within the school. Such hi-lights as the annual Slave Auction, which is put on by the Dental Assistants, and the visit of Canada's Governor General, Roland Michener, were presented in a most professional manner.

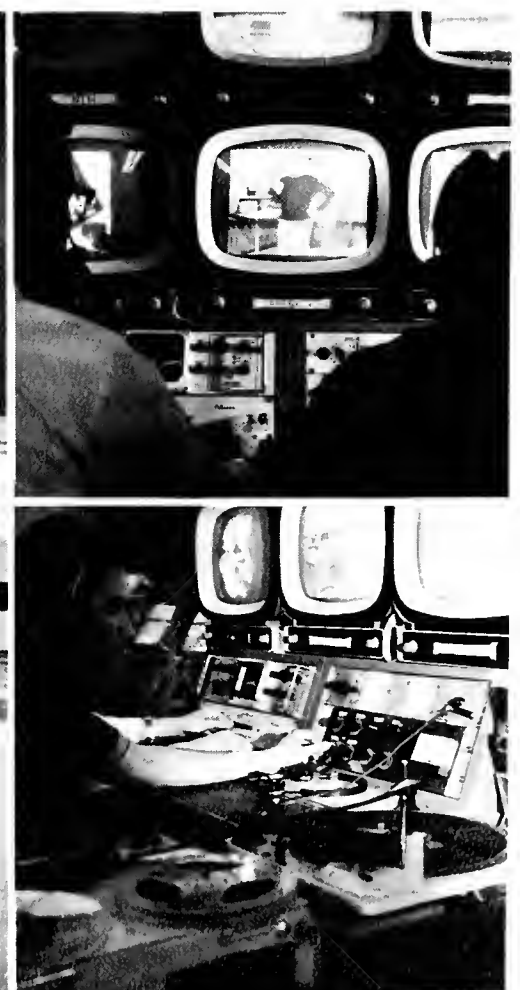

# Television

During Queen week N.A.I.T. T.V.'s cameras focused on all the dances and activities which were sponsored by the technologies for their Queen candidates. The students who could not personally attend were therefore brought closer to what was happening around the Institute. Along with these special events some very interesting documentaries were also presented.

As in previous years N.A.I.T. Television did play quite an important role on campus. We as students feel that this year's executive has accomplished much which can only be envied by following N.A.I.T. Television personnel.

## *Nugget*

The Nugget is the key voice in informing the students of N.A.I.T. on what is happening around the institute. The newspaper was a constant source of information sought out by all.

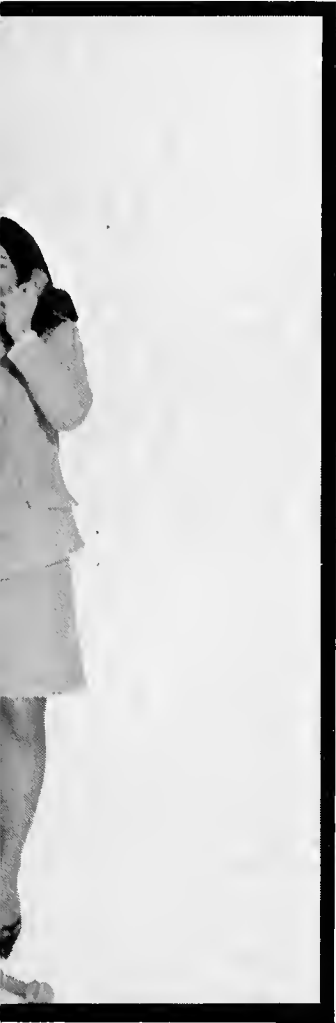

This year's editions of the Nugget proved to be one of the finest in recent years. This was expressed by the reactions of both students and instructors alike.

The Nugget staff did an outstanding job in covering all activities within the institute. Their coverage of the candidates involved in Queen Week, Frosh Week, and the N.A.I.T.S.A. Executive campaign gave the students an excellent view of them all. Their write-ups before and after these activities gave all students an insight into what was happening on campus.

Along with these highlights many articles appeared on different technologies, informing students on what other people are doing around campus. Every issue had articles on sports. These articles kept all students informed on the accomplishments of our teams. A new feature

was added this year called Student's Voice. This gave students a chance to express their thoughts on different issues going on within the institute.

Their efforts are greatly appreciated by all students and hope the Nugget Staff will feel proud of the work they have done for the institute this year.

# *The Northern Torch.*

Although the yearbook is the most sought after piece of reading material in the institute, it tends to be the least supported student service. However, after much anxiety and worry, Editor-in-Chief Geoff Lawrence managed to put together a handful of ambitious students to form the yearbook staff. The purpose of the yearbook is to serve as a memento of student functions and activities.

Without the voluntary contribution given by the people shown on these pages a 1968 yearbook could not have been possible. A special thanks goes out to Peter Zaworonok whose photo was not available.

# Yearbook

A typical Monday night would find the yearbook staff attempting to complete enough pages to meet the next deadline. Staff included:

THE QUEEN BALL . . . the climactic event of the year where Miss Sharon Kitz was officially named Miss NAIT for 1968. The PPCLI band provided the patrons with the best live music that has been heard in this school for some time and all seven of the candidates put the icing on the cake with their appearance. Hats off to Miss Kitz — a gracious and graceful queen sponsored by Electronics Technology.

# The Tense Times

The tense moments of the Queen Tea can be pretty hard on a girl but NAIT's best came through with flying colours. The continually watchful eyes of the three judges . . . the constant awareness by the girls of this . . . and continual public exposure for a whole week never phased our girls in the least. Hats off to Sharon and her court-a great group of girls.

## ...and The Fun Times

FUN TIMES. . . the campaign by the queens and their sponsors all added up to one great, absolutely fun-filled week that few people will forget for a long time. The zest-the daring-do of some-the unique originality of others-the whole-hearted support with which the campaign was entered into by all resulted in the best QUEEN WEEK that NAIT has witnessed in its short history. Hats off also to Don Walker - Social Chairman whose back-breaking task it was to organize it all.

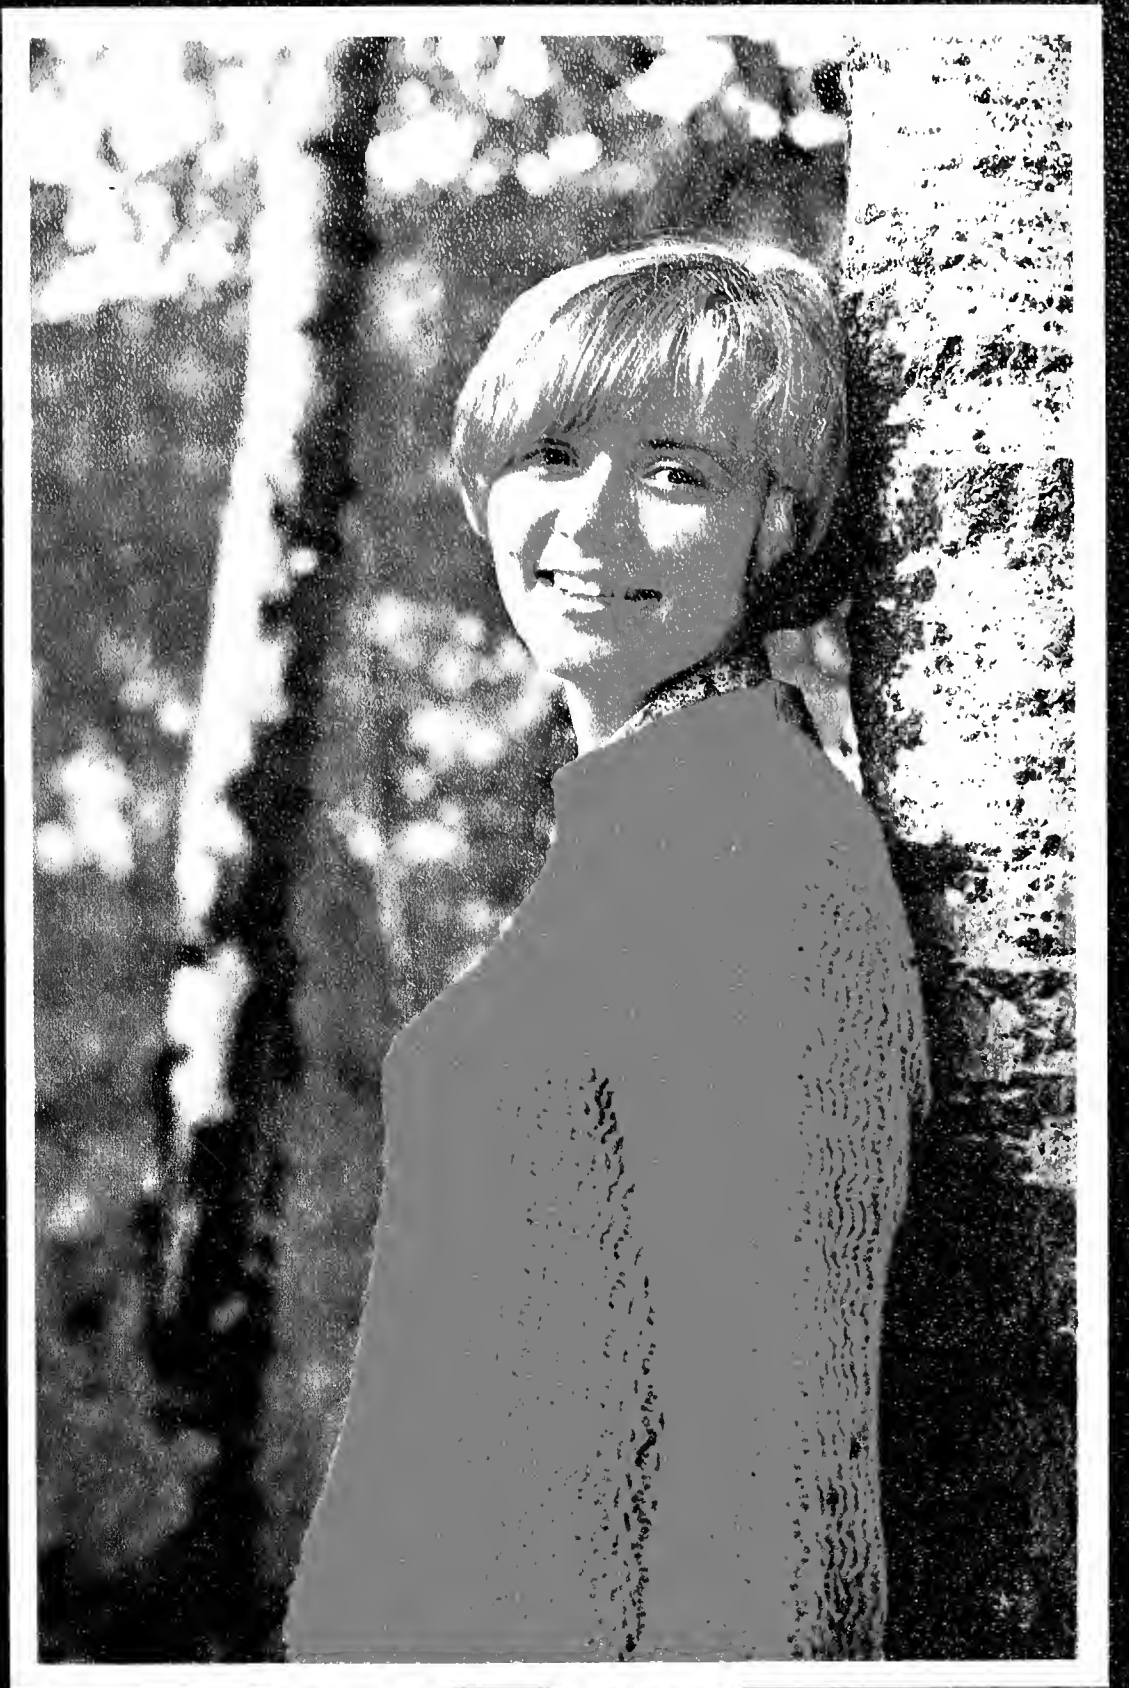

A black and white photograph of a maple leaf with a cluster of small, round berries on a branch. The leaf is large and has a prominent vein structure. The berries are small and round, clustered together. The background is blurred, showing other leaves and branches.

# Careers Day

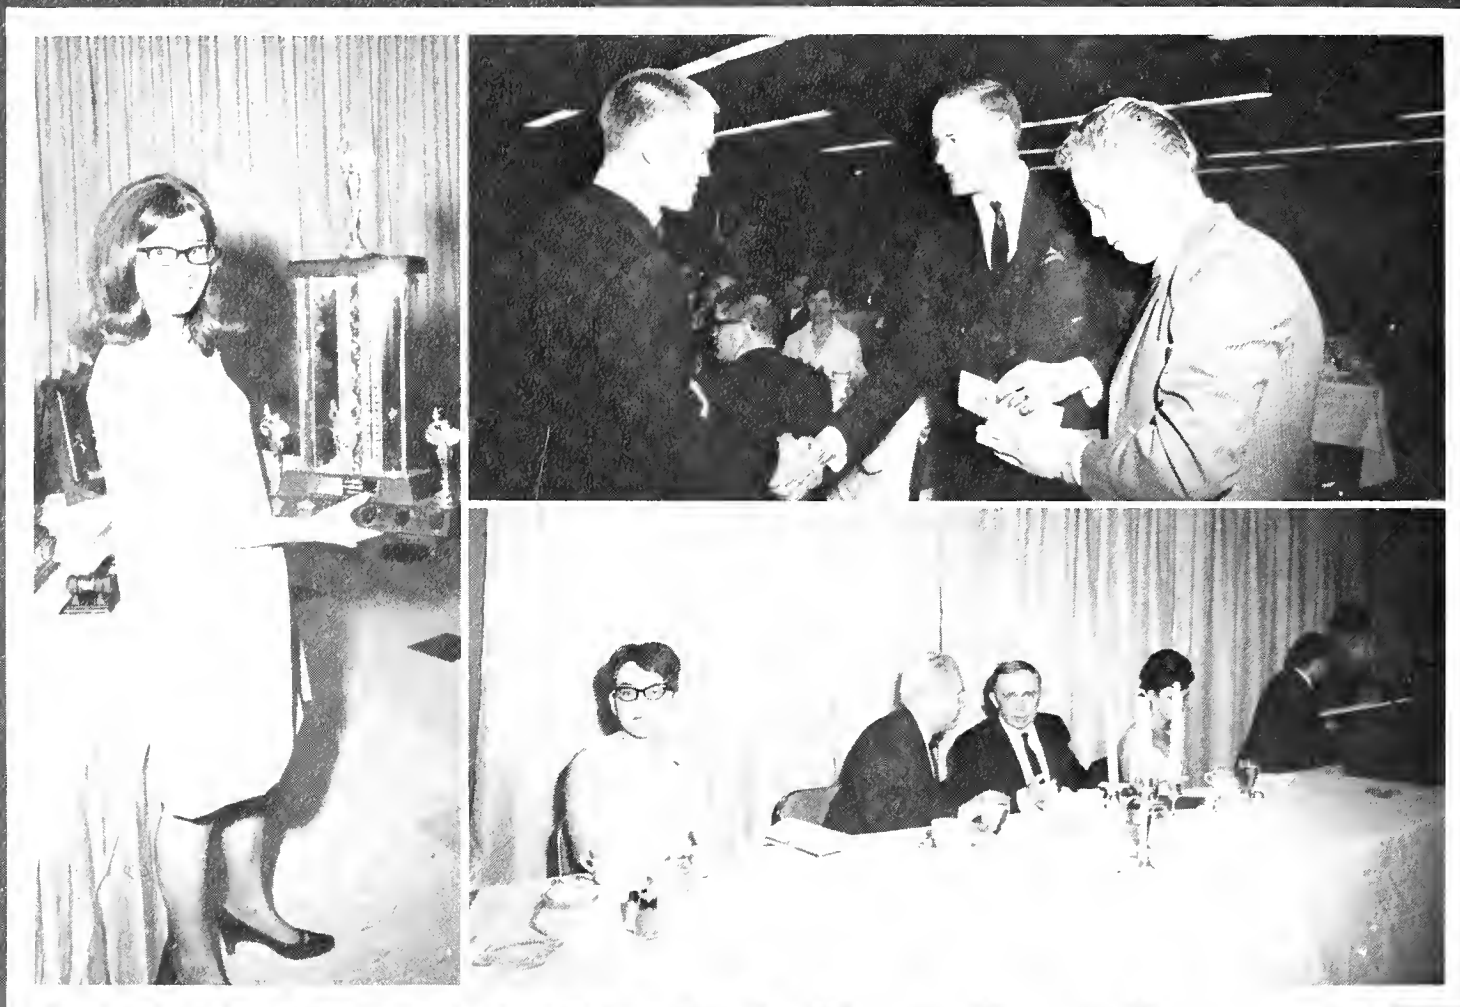

*Although few students know of this event it is one of the best public relations events used by the Institute. Certain staff and students visit district schools during their 'Careers Day' and answer questions that prospective students may have regarding N. A. J. and are also filled in on the social scene.*

# CONGRATULATIONS

On behalf of the City of Edmonton it gives me great pleasure to extend sincere congratulations to the 1967-68 graduating classes of the Northern Alberta Institute of Technology.

Today our greatest accomplishments are achieved through knowledge and understanding. Education, the key to this knowledge, provides the leadership we so urgently need in our rapidly changing scientific and technological world.

As you embark upon a career, you will find guidance and confidence in the high scholastic standards set by your college training.

Our congratulations and best wishes for every success.

Mayor

## THE PROFESSIONAL ENGINEER- PIONEER OF ALBERTA ACHIEVEMENT

There's a proud future for you  
in POWER!

Send for career information to  
Planning Engineer, Calgary  
Power Ltd., Box 1900, Calgary

**CALGARY POWER LTD.**

Serving Albertans for over half a century

Since 1912 the Professional Engineers of Calgary Power have pioneered in the development of our province. Many prepared themselves for engineering careers in Alberta's own High Schools and Universities. Such great hydro and thermal power projects as Spray, Brazeau and Wabamun are results of their skills in all fields of engineering — civil, mechanical and electrical. Calgary Power's continuing expansion program is opening new doors for the engineering graduate, in an enterprising company that is helping to attract new and diversified industries to Alberta. Today's engineering opportunities with Calgary Power offer greater scope than ever before for individual initiative and personally rewarding achievement.

# Careers

For Institute of Technology Graduates

**CHEMCELL LIMITED**, manufacturer of chemicals and textiles, offers challenging career opportunities at its Edmonton plant for chemical, drafting, electrical, electronics, instrument, mechanical, and power engineering technologists.

Electronics technologist Alf Janz (at right in photo) has had many interesting assignments since joining Chemcell.

In his present position he carries out process control studies and participates in the development of unique process control equipment.

This picture shows him engaged in trouble shooting a logic problem in process computer wiring.

# Alberta...

where opportunities are a whole lot better !

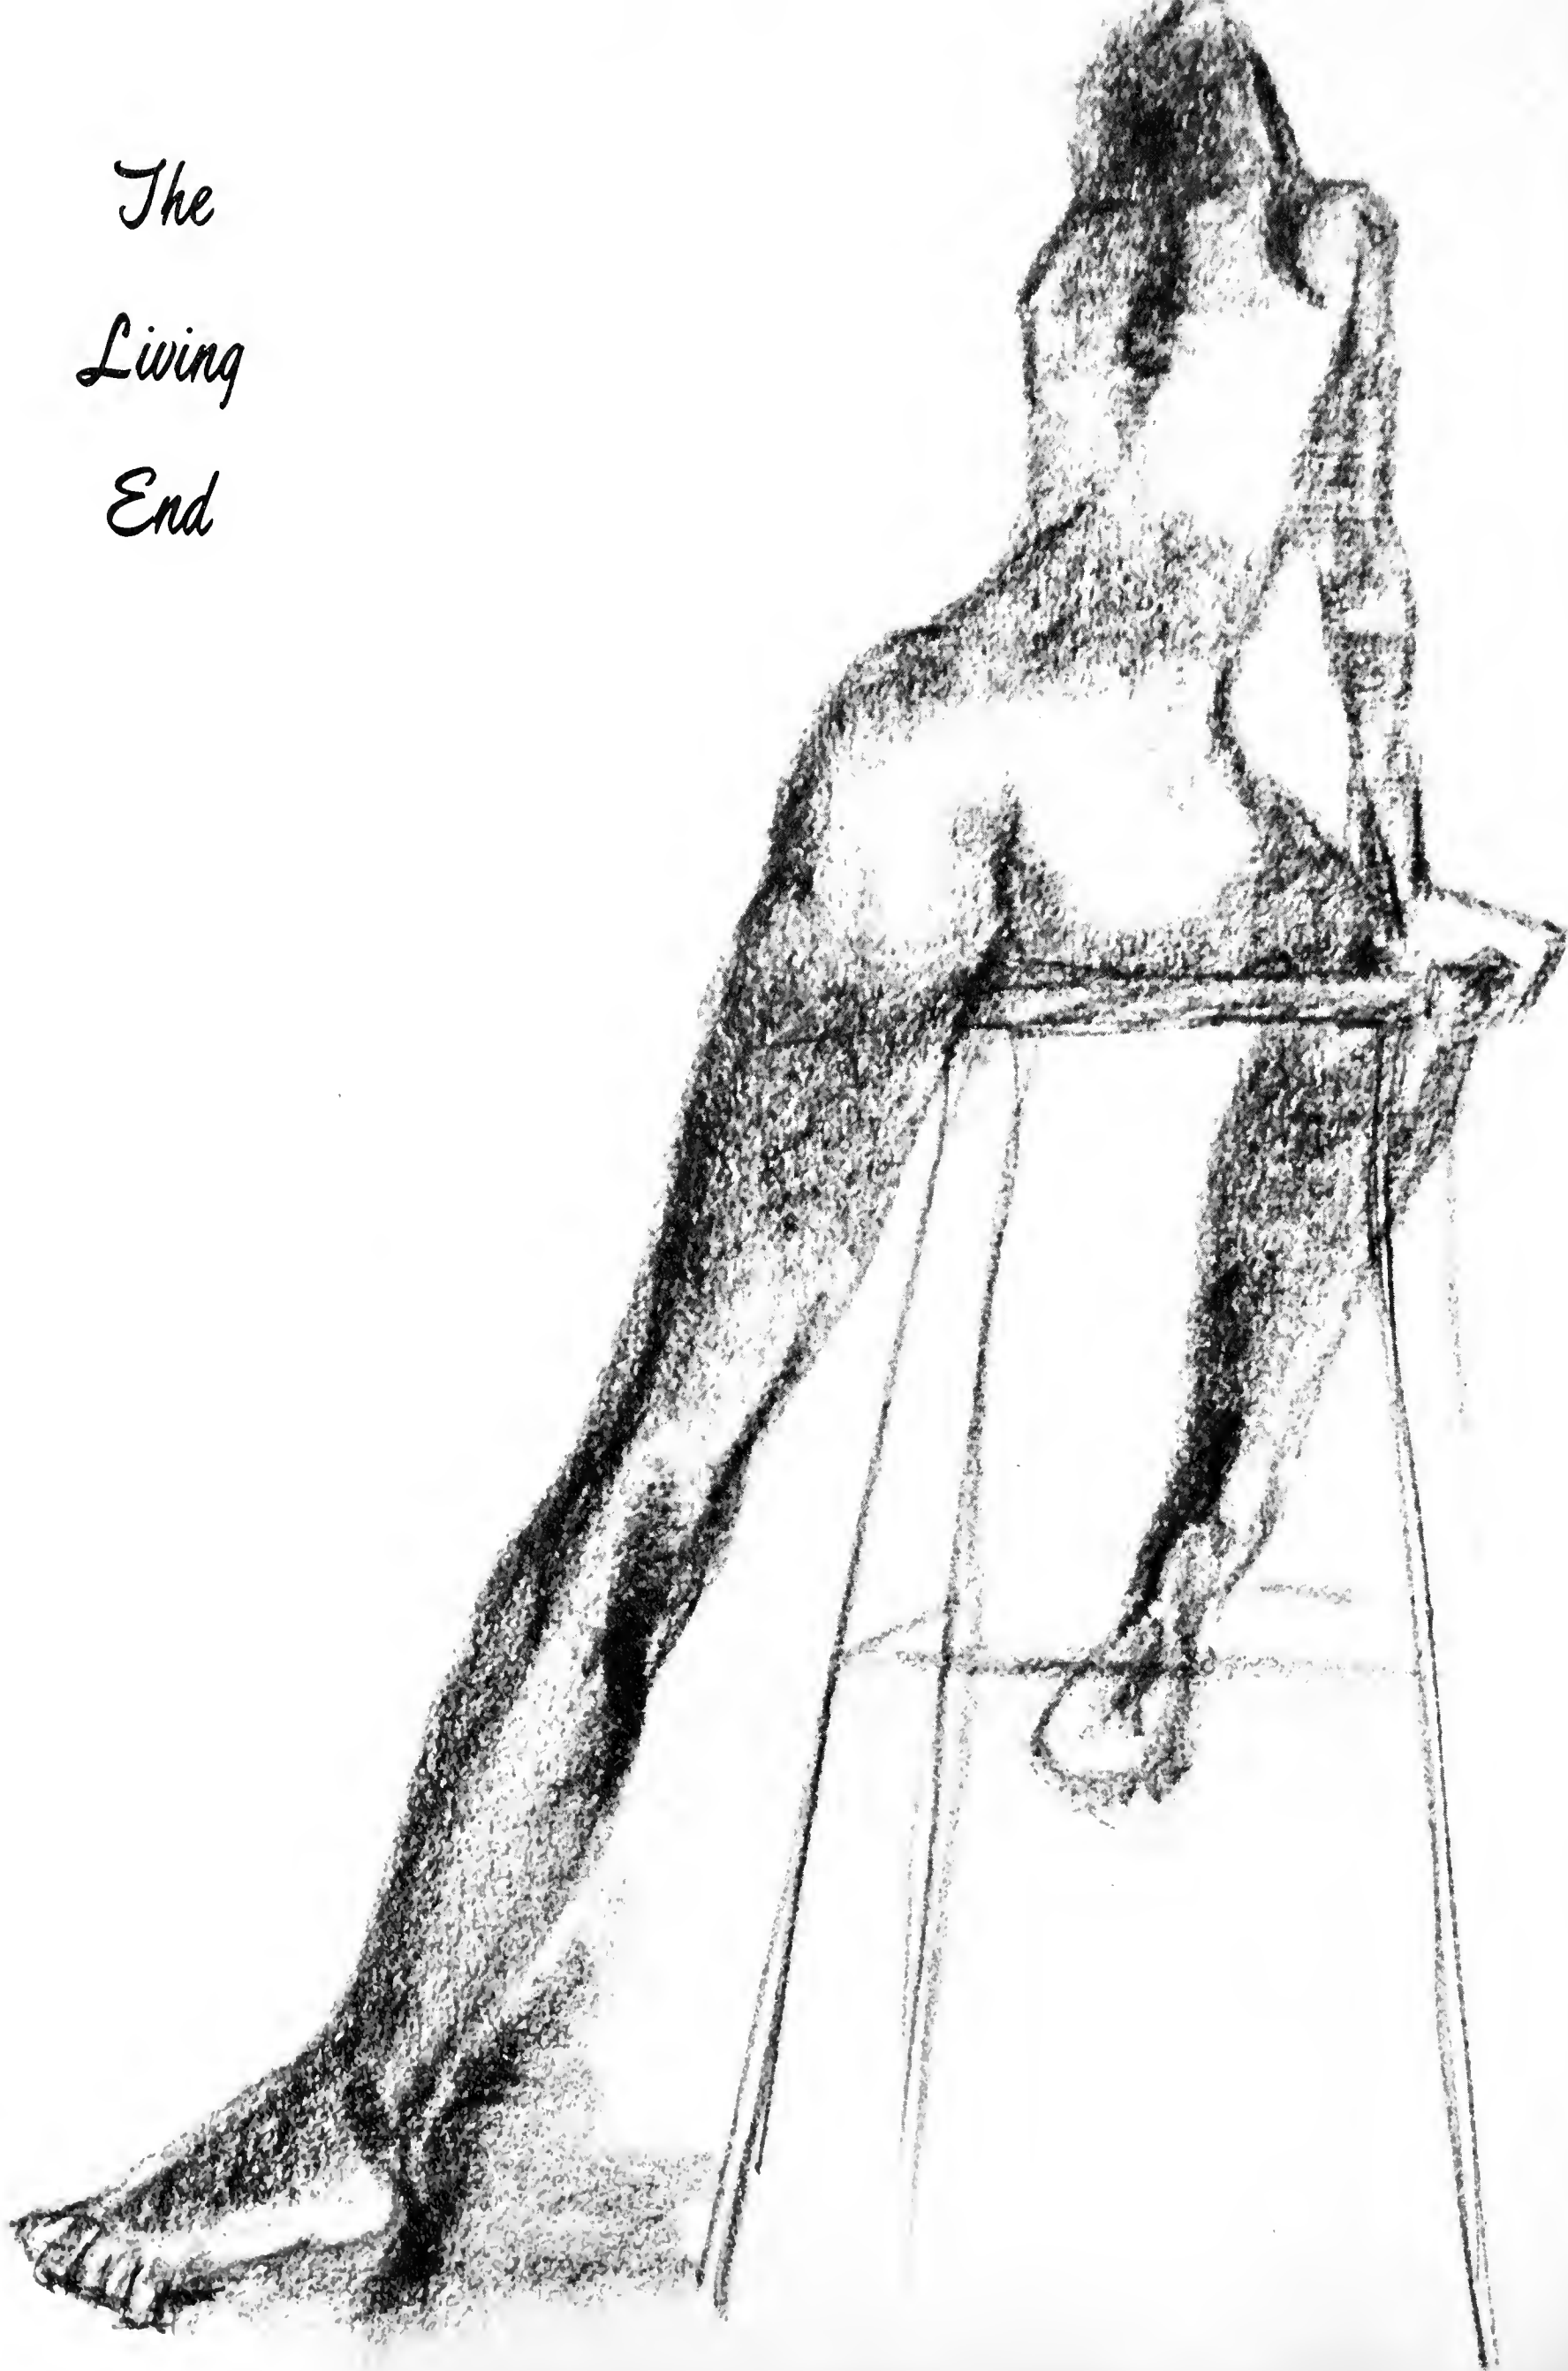

Alberta is a veritable "powerhouse" of natural resources . . . 89% of Canada's petroleum reserves . . . 80% of her natural gas and 50% of her coal are to be found in our province. That's something to consider . . . because abundant natural resources provide a solid base for growth . . . a natural stimulant to industrial and commercial development.

We know . . . we've been here since 1923 !
